

LET'S GET VACCINATED!

As the weather changes, so do the risks of getting sick. Respiratory viruses such as the common cold, flu, COVID-19 and RSV can take a toll on your health.

You can protect yourself and loved ones with vaccines.

The flu and RSV can potentially lead to serious complications, especially for young children, older adults and individuals with weakened immune systems.

Getting vaccinated against the flu, COVID-19, and RSV is one of the best ways to stay healthy.

It takes only a few minutes, and it is an easy step to take to protect yourself, your family, friends and community.

Vaccines for these viruses are safe, effective, and available at your local healthcare facility. Talk to your healthcare provider about the vaccines you need and stay protected this season. Stay safe and get vaccinated.
